Machine Learning Starter Pack

7 algorithms, the right metrics, and a 60-day plan.

Swipe →

The 7 algorithms

- Linear Regression
- Logistic Regression
- Decision Tree
- Random Forest
- XGBoost / LightGBM
- K-Means
- KNN

Pick the right metric

- **Precision**
  False positives are costly
- **Recall**
  False negatives are costly
- **F1**
  Balance of both
- **RMSE**
  Regression error

"99% accurate. Why is that bad?"

If 1% is fraud, predicting "not fraud" every time is 99% accurate and catches nothing.

Check recall and the confusion matrix. Use class weights or resampling.

60 days from zero

- **Days 1-10**
  Python + Pandas
- **Days 11-20**
  Statistics
- **Days 21-45**
  Scikit-learn and metrics
- **Days 46-60**
  2 end-to-end projects
